Re: Magna Metals, Site # 360003

Dear Ms. Dewes:

We are in receipt of your letter dated 2/4/02 regarding the demolition of the shed at the above referenced site. We appreciate your response and comments relating to this matter.

ERM Northeast will be our environmental consultant during the demolition process. They will be forwarding a proposal shortly to address any testing and sampling that may be required per applicable laws and ordinances. You will be copied on this and all relevant correspondence and analytical data.

We have some questions relating to the demolition. First, should ISC/Magna Metals be made aware of any work prior to commencement or have you done so already? Second, during our previous conversation we discussed the need to encapsulate the concrete, which you said was unnecessary. The question now is can we cover it with asphalt and use it for parking purposes? This would include guard rails to keep vehicles off of the dirt/grass areas.

Thanks for your help.

Sincerely,

Douglas Grimmer, CPM
Property Manager
